Creating a European observatory on femicide

To mark the international women's day, COST Action "Femicide across Europe" stresses the importance of continuous efforts to counter the phenomenon killing thousands of women every year, worldwide. Network members are now looking for partners and stakeholders to set up a European observatory, and plan to discuss the next steps at the network's

COST Actions

COST Actions are a flexible, fast, effective and efficient networking instrument for researchers, engineers and scholars to cooperate and coordinate nationally funded research activities. COST Actions allow European researchers to jointly develop their own ideas in any science and technology field.

COST Actions are bottom-up **science and technology networks, open to researchers and stakeholders** with a duration of four years. They are active through a range of networking tools, such as workshops, conferences, training schools, short-term scientific missions (STSMs), and dissemination activities. **COST does not fund research itself.**

COST prides in its support for high-risk, innovative and emerging research themes. However, **COST does not set any research priorities.**

COST Actions can also pave the way to or establish synergies with EU-funded research projects. Moreover, collaboration within research projects can also lead to new Actions, thus enhancing the networking potential of such consortia.
