Status of the Student during the Exchange Period

Article 17

During mobility at the Receiving Institution abroad, students retain their status of students at the University.

Students whose tuition fees are financed from the budget of the Republic of Srpska shall retain the funding status for the duration of the Exchange Period.

Students whose tuition fees are co-financed are to continue making regular payments of the tuition fee to the University for the duration of the Exchange Period.

At the student's written request, the Faculty/Academy of Arts is obliged to issue a certificate that the student is in mobility.

Recognition of the exchange period

Article 18

A student at the University who has carried out mobility based on a signed Learning Agreement is entitled to the recognition of the results achieved at the Receiving Institution by the University.

The recognition of the period of exchange is a procedure by which the relevant Commission for the recognition of the period of exchange carried out abroad determines the results which the student has achieved during mobility and issues a decision on the recognition of passed exams (ECTS credits and grades). The final output of the procedure is a Decision on the recognition of the period of exchange.

The student is obliged to submit all relevant documents regarding the carried out mobility to the relevant Commission for the recognition of the period of exchange carried out abroad no later than 30 days prior to the beginning of the semester.

These documents include a written request, the original Learning Agreement and/or Learning Agreement – Student Mobility for Traineeships and/or Learning Agreement – Student Mobility for Traineeships and/or Learning Agreement – Student Mobility for Research, and any amendments to the agreement, Transcript of Records from the Receiving Institution, i.e. Transcript of Work, a document on the grading system at the Receiving Institution (if this information is not included in the Transcript of Records), as well as copies of these documents.

If the student is unable to meet the deadline because they lack documents from the Receiving Institution, they are obliged to notify the Vice-Dean for Teaching.

The relevant Commission for the recognition of the period of exchange carried out abroad is obliged to issue the Decision on the Recognition of the Exchange Period no later than seven work days upon submission of a full request and no later than 15 days prior to the beginning of the semester in which the student is to continue their studies at the University. The Decision shall be delivered to the student and the relevant student affairs office.

If this administrative procedure is not completed within the set deadlines or if the student was unable to submit relevant documents within the set deadlines, the University shall allow the student to continue their studies with a requirement to complete the procedure as soon as possible.

A student of the University who has carried out mobility without a signed Learning Agreement may submit any available documents relative to the mobility to the Commission for the recognition of the period of exchange carried out abroad, which will then carry out the equivalence procedure and issue a Decision on the recognition or dismissal of the achieved results.

Principles of the recognition of the exchange period

Article 19

Recognition of results (ECTS credits and grades) obtained during mobility is based on the principles of transparency and flexibility.

The transparency principle requires that the rules on the recognition of the exchange period are publicly available (at the website and notice boards of the Faculty/Academy of Arts etc.)

The flexibility principle implies that the recognition of academic results achieved during mobility is based on ascertained similarities and learning outcomes of the two programmes. The principal factor for issuing the Decision is the knowledge in a certain field that the student gains during mobility, which does not have to be identical, but merely comparable to the knowledge the student would have otherwise gained by attending a given course at the University.

Article 20

The purpose of mobility is to allow the student to carry out academic activities at the Receiving Institution, and to acknowledge the Exchange Period as if it was spent at the University.

A student who has not passed all the exams at the Receiving Institution which were defined in the Learning Agreement, i.e. has not earned the required 30 ECTS credits per semester, but has attended the relevant classes, is entitled to take the equivalent exams at the University from the semesters spent in mobility, without taking any mandatory midterms. At the student's request they will be allowed to take midterms post festum in order to earn more ECTS credits and a higher grade.

Comparison and evaluation of the similarity of course units

Article 21

The primary task of the Academic coordinator for international student and staff mobility is to sign the Learning Agreement and/or Learning Agreement – Student Mobility for Traineeships and/or Learning Agreement – Student Mobility for Research, and any amendments thereof.

When assessing the similarities of the course units which the student has proposed to attend at the Receiving Institution within the relevant exchange document, the Academic coordinator for international student and staff mobility is obliged to consult the teaching staff in charge of the relevant course units at the University.

The comparison and evaluation of the similarities of course units at the University and at the Receiving Institution after the student has returned from mobility is carried out by

the Commission for the recognition of the period of exchange carried out abroad, following the flexibility principle.

A full recognition means that after returning from mobility the student has completed all the course units which were replaced by course units completed at the Receiving Institution in accordance with the Decision on the Recognition of the Exchange Period.

Transfer and recognition of ECTS credits and grades

Article 22

The primary criteria for the transfer and recognition of ECTS credits and grades earned during mobility are the learning outcomes, based on the Learning Agreement and Transcript of Records, and in accordance with the following recommendations:

1. The recognition of the course units which the student has attended and passed at the Receiving Institution, and which are comparable, i.e. similar to some course units at the University, is carried out by implying that the student has passed the required course units at the study programme at the University. The student shall be awarded the titles and ECTS credits of the comparable course units at the University, regardless of whether the course units which the student passed during mobility carried more or less ECTS credits.
2. The recognition of course units at the University referred to in paragraph 1 of this Article applies for both compulsory and elective course units. Section 6.1 of the Diploma Supplement ("Additional Information") shall note that specific course units were passed during mobility at the relevant higher education institution abroad and shall state the exact title of the course units (in the original language and in Serbian), the original grade, ECTS credits and the grading system at the Receiving Institution, exactly as stated in the Transcript of Records.
3. The recognized elective course units do not have to match the list of elective course units at the given study programme at the University.
4. If the achieved learning outcomes do not fit the learning outcomes of the study programme attended by the student at the University, the information on the course units passed and results achieved at the Receiving Institution is included in the Diploma Supplement, in the original language and translated into Serbian, under Section 6.1 ("Additional Information"), by adding the following subsection: "Passed course units / activities which have not been defined in the study programme towards a diploma", stating the fact that these course units have been passed during mobility, the name of the higher education institution and the grading system, exactly as stated in the Transcript of Records.
5. The student shall be awarded the grades earned at the Receiving Institution. If the grading system at the Receiving Institution is different than that of the University, the grades are harmonized and converted into equivalent grades at the University, in accordance with the formula for converting grades from the Receiving Institution to grades at the University.
6. The harmonized grades from the course units the student has passed during mobility, which have been recognized as passed at the University, shall count towards the student's average grade at the University. Grades which the student has earned for course units which have not "replaced" comparable course units at the University, but have been stated in their original form in accordance with paragraph 1, line 4 of this Article, do not count towards the average grade.
7. ECTS credits and grades from paragraph 1, lines 1, 2 and 3 of this Article, are treated the same as for any other course unit which the student has passed at the University (the ECTS credits are counted towards the total ECTS credits earned within the relevant study programme).

8. The ECTS credits for course units from paragraph 1, line 4 of this Article do not count towards the number of ECTS credits within the given study programme, but towards the total number of earned ECTS credits.

Interpretation and conversion of grades which the student has earned during the exchange period at the Receiving Institution

Article 23

The student shall be awarded a grade earned during mobility for a course unit which can be “replaced” with a course units at the University, in case the grading systems at the Receiving Institution and at the University differ, by converting the grade earned during mobility into an equivalent grade at the University (the so-called harmonized grade”).

The harmonization process is carried out in accordance with the formula for converting grades from the Receiving Institution into grades at the University.

Instructions on converting grades from the Receiving institution into grades at the University can be found in Appendix No. 9.1 and 9.2.

Article 24

The provisions of this Rulebook which apply to Student Mobility for Studies shall analogously apply to Student Mobility for Research and Student Mobility for Traineeships.

The Faculty/Academy of Arts which offers the study programme to be attended in part by the Incoming Student, is obliged to issue a logbook* to the Incoming Student and keep written and electronic records on incoming students, their attendance, passed exams and achieved results, as provided by legislation, general and other documents. * students’ booklet for certifying attendance, exam grades and other activities and results
