Welcome Address

Dear Colleagues,

On behalf of the Serbian Pathologists and Cytologists Association, it is our great honor and pleasure to welcome you to the 18th National Congress of the Serbian Pathologists and Cytologists Association (SPCA) with International Participation.

The Congress Scientific Committee has dedicated significant effort to offer valuable insights into current advancements in pathology, with a particular focus on the field in Serbia. We have curated a series of sessions featuring distinguished speakers from both our nation and abroad. These sessions will encompass symposia, short courses, special sessions, slide seminars, oral presentations, poster sessions, and, most notably, keynote lectures. This diverse program will afford all of us the opportunity to convene and engage in discussions pertaining to the latest developments, challenges, and issues within our profession.

We extend a special welcome to those who are relatively new to the field of pathology, our pathology residents, who decided to partake in this significant event that takes place biennially. This participation will undoubtedly enhance their knowledge, contributing to the future advancement of pathology.

As we engage in the scientific program, exchange ideas, make new connections, and cultivate friendships, we look forward to creating cherished memories while experiencing the traditional Serbian Vojvodina hospitality in Novi Sad.

We warmly welcome you,

Prof. dr Milana Panjković
President of SPCA
SPCA Advisory Board

Pozdravna reč

Drage kolege,

Čast nam je i zadovoljstvo da vam ispred Udruženja patologa i citologa Srbije poželimo dobrodošlicu na 18. Nacionalni kongres Udruženja patologa i citologa Srbije (UPCS) sa međunarodnim učešćem.

Naučni odbor kongresa je uložio veliki trud da kroz različite sesije u kojima učestvuju brojni istaknuti predavači iz zemlje i inostranstva pruži uvid u aktuelna dostignuća u patologiji uopšte, sa posebnim akcentom na patologiju u Srbiji.

Simpozijumi, kratki kursevi, specijalne sesije, slajd seminari, usmene prezentacije, poster sesije i kao kruna svega počasnica predavanja, omogućiće svima nama da se upoznamo sa novinama, problemima i izazovima u našoj struci.

Posebno želimo da pozdravimo one koji su relativno novi u svetu patologije, naše lekare na specijalizaciji, koji su odlučili da učestvuju u ovom značajnom skupu koji se organizuje svake druge godine i tako se uvere da na taj način unapređuju svoje znanje kojim će u budućnosti uticati na razvoj patologije.

Zajedno, učenjem kroz naučni program, razgovorom i sticanjem novih poznanstava provešćemo lepe trenutke i stvoriti uspomene u atmosferi tradicionalne srpske, vojvođanske gostoljubivosti u Novom Sadu.

Srdačno vas pozdravljamo,
